## AMENDMENTS TO THE SPECIFICATION

The computer 1312 may further include a hard disk drive 1324, a magnetic disk drive 1326, e.g., to read from or write to a removable disk 1328, and an optical disk drive 1330, e.g., for reading a

## In the Specification:

Please amend pg. 34, Il. 3 – 27 of the specification as follows:

CD-ROM disk 1332 or to read from or write to other optical media. The hard disk drive 1324, magnetic disk drive 1326, and optical disk drive 1330 are connected to the system bus 1318 by a hard disk drive interface 1334, a magnetic disk drive interface 1336, and an optical drive interface 1338, respectively. The computer 1312 typically includes at least some form of computer readable media. Computer readable media can be any available media that can be accessed by the computer 1312. By way of example, and not limitation, computer readable media may comprise computer storage media and communication media. Computer storage media includes volatile and nonvolatile, removable and non-removable media implemented in any method or technology for storage of information such as computer readable instructions, data structures, program modules or other data. Computer storage media includes, but is not limited to, RAM, ROM, EEPROM, flash memory or other memory technology, CD-ROM, digital versatile disks (DVD) or other magnetic storage devices, or any other medium which can be used to store the desired information and which can be accessed by the computer 1312. Communication media typically embodies computer readable instructions, data structures, program modules or other data in a modulated data signal such as a carrier wave or other transport mechanism and includes any information delivery media. The term "modulated data signal" means a signal that has one or more of its characteristics set or changed in such a manner as to encode information in the signal. By way of example, and not limitation, communication media includes wired media such as a wired network or direct wired connection, and wireless

media such as acoustic, RF, infrared and other wireless media. Combinations of any of the above should also be included within the scope of computer readable media.
